

Training Cork Paint spraying

Interested in innovative sustainable material for construction or design projects?

CoFlora supplies versatile cork paint that facilitates thermal **isolation**, **acoustics**, **waterproofing**, damp preventing/resolving, surface sealing and refurbishment.

It is a natural coating made of cork oak tree bark granules in a water-based emulsion. Cork spray paint is useful as a protection of constructive elements against **humidity**, salt water, weather, condensation, thermal balancing. In addition to that it is a great decorative, warm and resistant material, that adds **authenticity** to a space or as part of an object.

Examples here: <https://coflora.org/products/spray-cork/>

Application:

Outdoors - facades, roofs, terraces other surfaces exposed to rain/weathering

Indoors - ceilings, walls, pipes, small objects, furniture, lamps and more

It can be applied on **all surfaces** (wood, metal, cement, bricks etc). Considerably flexible- can be used on irregular, cracked and moving surfaces.

Appearance: Paste like mix in a 12 kg bucket, Sprayed with a special Spray gun

Available in 40 colours

*EU standards building material. Biobased, Sustainable. Nature & Kids friendly, Fire class B
Production and origin : Spain

If you see potential of applying this material in your company's projects or product, if you would like to have an inhouse spray specialist who can deliver quality application, whereby all magnificent properties of cork are preserved - Welcome to attend this unique training.

CoFlora invites company representatives to receive theoretical and practical training on cork paint application. A founder of this cork paint is coming from Spain to pass on the expert knowledge and skills, for companies to start using this versatile material in the Netherlands, and improve overall Carbon and sustainability performance.

What to expect?

2 half days, **November 25 -26, 2024**

Day 1. AM Session

10.00 -11.00 Intro, Theory, preparation before application / inventory

11.00 -11.30 break , Q & A

11.30-12.30 Practics, spraying Layer 1, Q & A

Day 2. PM Session

14.00 Status check, Q & A, theory

14. 45 -15.30 Practics, Spray Layer 2 / results , aftermath

15.30 - 16.00 Study of positive & negative scenarios/ possible applications

16.00 -17.00 Q & A, Certifications, Closing

Location: MAAK terrain, [Oudeweg 91-95. 2031 CC Haarlem](https://www.google.com/maps/place/Oudeweg+91-95,+2031+CC+Haarlem)

Participation fee per person 370 Eur , registration is only confirmed after pre-payment is complete

Please RSVP until November 18th by sending email to askcork@coflora.org, providing Full name of the participant, contacts and the name of a represented company.

**With Certification from this Training, Kliu Factory provides a 10+ years guarantee for their products application.*

As a result your company becomes a partner of CoFlora Design in Benelux, the official representative of Kliu Factory.
